FOR IMMEDIATE RELEASE

Kisco Releases new iSeries Security Product

Saranac Lake, NY, November 27, 2006: **Kisco Information Systems** (www.kisco.com) today announced the release of a new security product for the IBM System i family of servers. Named iFileAudit, the new product offers numerous features for tracking changes to fields and files in native System i databases.

With iFileAudit you can track the following changes:

- Track changes to a specific field on a specific record to review how the current field contents were entered.
- Track both manual field changes and changes to fields done by program calculations.
- Identify the user profile that was used to make each file, record and field change.
- Identify the program that was used to make each file, record and field change.
- Identify the location from which each file change was made.

iFileAudit includes online drilldown reporting tools and customizable printed audit reports. Reports can run against a global or selected basis for each file being tracked.

This versatile package can have numerous applications within your organization. Use it to find the guilty party when unexpected or erroneous data shows up in your applications. Or use it as an audit trail tool for HIPAA, SOX or other internal change management controls. iFileAudit can also be used by application developers or system administrators to understand how a server process affects a field value during its execution.

Complete product specs and other information, including screen shots and support information, are available at www.kisco.com/ifa.

iFileAudit, is priced at \$995.00 for any iSeries or AS/400 computer. For companies with several systems, Kisco offers multiple-license discounts. LPAR price is \$1,595.00. Kisco Information Systems offers a free 30-day evaluation of the product that can be downloaded with complete software documentation in PDF format from www.kisco.com. To obtain a free evaluation on CD call Kisco at (518) 897-5002 or e-mail sales@kisco.com.
