FOR IMMEDIATE RELEASE

Kisco Announces The Release of WebReport/400 v8.0

Saranac Lake, NY, September 19, 2005: **Kisco Information Systems** (www.kisco.com) today announced the immediate availability of version 8.0 of their WebReport/400 package. WebReport/400 is an ebusiness utility for automatically converting iSeries and AS/400 reports and distributing them in email or as internet/intranet content. The new version, with many updates initiated by customer request, expands the tool's functionality and administration capabilities.

On the administration front, a new Message Monitor function lets your iSeries administrator monitor any message queue in the system and get an email notification when messages are received in the message queue. The File Monitor function lets you set a monitor on a OS/400 database file and receive email notifications whenever that file is updated, has records added, has records deleted or even when records have been read. This feature can be set to only happen during off hours or at any time. Finally, a new option for the report

distribution notification email can show all recipient email addresses to which the report has been sent.

Other new functionality includes a feature that produces a listing of the entire WebReport/400 Address Book. Another optional feature restores all previously saved spool files onto your system. New routing options can route reports based on the contents of the user data (USRDTA) field in a spool file.

Finally, new file naming options provide customers with more flexibility when creating files automatically. File names can be date differentiated or sequentially numbered with a user controlled prefix.

Complete product specs and other information, including case studies and screen shots, are available at www.kisco.com/webreport.

WebReport/400 PDF, is priced at \$1,795.00 for any iSeries or AS/400 computer. For companies with several systems, Kisco offers multiple-license discounts. Kisco Information Systems also offers a free 30-day evaluation of the product that can be downloaded with complete software documentation in PDF format from www.kisco.com. To obtain a free evaluation on CD call Kisco at (518) 897-5002 or e-mail sales@kisco.com.
